

REGULAR VEHICLE MAINTENANCE

STAY ON TOP OF REGULAR MAINTENANCE.

It's important to get a licensed professional to work on your vehicle, DIY work can be costly and a danger to yourself and other drivers if the job isn't done correctly.

OIL CHANGE

BATTERY CHECK

LIGHTS

TIRE SERVICE:

Tire Rotation
Wheel Alignment

Tire Tread Depth
Tire Balance

HEATING & A/C

Heating and Air Conditioning are a luxury many of us enjoy, make sure everything is in good shape by having your mechanic take a look.

FLUID

A simple way to prevent wear and tear on your vehicle is by making sure your fluids are being changed on a regular basis. Flip over to the back for a list fluids you should change.

BRAKE SERVICE

For the safety of yourself and those around you make sure to get your brakes checked regularly.

AIR FILTER

Your Engine & Cabin Air filter both contribute to the clean air inside your vehicle, it's important to get these changed for air quality and engine function.

MAINTENANCE CHECKLIST

Look in your owners manual for more information on when to schedule these services.
